## EXPERIENCE

**San Francisco Chronicle | Graphics Intern**  
*May-August 2016 | San Francisco, CA*

- Worked with writers and designers to develop static and interactives for print and web on a daily basis.
- Coordinated with more than 70 news organizations in the Bay Area to build graphics for an investigative series.
- Sent out public records requests and set up interviews to curate data for designs.

**Open Oakland | Information Designer**  
*June-August 2016 | Oakland, CA*

- Worked with Oakland City Government to create open data projects for the general public.
- Communicated with developers and public information officers to design applications to easily access city data.
- Helping re-brand and re-build the organization's website.

**Future of Student Media | Webmaster**  
*September 2015-Present | Athens, OH*

- Created a website to advertise the organization using Front-End Skillset.
- Setup weekly meetings with content creators and developers to figure out the best methods to advertise events.
- Managing the development of an application to let students know about digital innovations on campus.

**WOUB Public Media | Web Designer/Developer**  
*March 2015-Present | Athens, OH*

- Curating data to write stories and create infographics using the Adobe Creative Suite and front-end coding languages about issues in Southeast Ohio.
- Designing and developing applications in HTML, CSS, and Javascript to showcase photos, stories, and multimedia on woub.org.
- Created various social media banners for TV programs.
- Helped manage graphics database and Content Management System for WOUB staff.

**Flashstarts Inc. | Design/Web Development Intern**  
*May-August 2015 | Cleveland, OH*

- Developed user interfaces and websites for multiple companies.
- Designed various print materials such as banners, business cards, fliers, and brochures.
- Practiced agile development and Lean UX with other developers to create applications.

**Procter and Gamble via INTERalliance | Solutions Interface Designer/Data Curator**  
*June-August 2014 | Cincinnati, OH*

- Led the design of a user interface (UI) and data visualizations with a culturally diverse team to a consumer base of more than 1,000 people.
- Collaborated with the global development team to develop the UI and data visualizations by prototyping and refining the design with users' feedback, in phases.
- Planned and executed socialization events to influence users to use new database software.
